Objectives

A motivated fresh graduate with a strong interest in web applications and backend development. Experienced in building web systems using TypeScript, Node.js, and Databases, with hands-on experience in modern development tools and workflows. Seeking a Web Developer role with strong motivation, adaptability, and eagerness to continuously learn new skills, while contributing to the development of maintainable, efficient, and scalable systems. A proactive team player who enjoys problem-solving, supporting teammates, and continuously improving technical skills.

Education

Thammasat University (Thailand), *2021—2026*

Bachelor of Science in Computer Science

GPAX: 3.10

Experience

Coursework Projects, Thammasat University

Oct 2023—Dec 2023

- Deployed a Linux server using Rocky Linux 9 on Linode cloud platform to host web applications.
- Configured services including DNS server, Apache web server, MySQL database, and SSH for remote access.

IT Support Intern, Birla Carbon (Thailand) Public Co., Ltd.

Jun 2024—Jul 2024

- Provided technical support to end-users, resolving hardware and software issues.
- Assisted in setting up, configuring, and maintaining workstations, printers, and network equipment.

NATIONAL SCIENCE AND TECHNOLOGY DEVELOPMENT AGENCY (Traffy Fondue Group, Traffy Team)

Jan 2025—Apr 2025

- Developed a LINE Chat Bot to facilitate the reporting of issues in LINE groups, enhancing communication and issue resolution.

Golden Jubilee Medical Center (Academic Research and Services)

Aug 2025—Dec 2025

- Developed a web-based internship application management system with automated application scheduling and centralized data management.
- Designed a modular Frontend-Backend architecture integrating Google Forms, Google Sheets, and Encore.ts for automated scheduling and API services.

Activities

Practical Training: "Development of Email Servers to Support Thai Language Emails (EAI)" by THNIC

Nov 2023

- Participated in an intensive hands-on workshop conducted by THNIC aimed at equipping participants with the skills to develop email servers capable of supporting Thai language emails (EAI).
- Successfully configured and deployed personal email servers using Ubuntu operating system, enabling practical experience in server setup and administration.

Tech Stack

- **Languages:** TypeScript, Python, Java, C#
- **Frontend:** React, Next.js, Django, HTML, CSS, Tailwind CSS
- **Backend:** Node.js, Encore.ts, Django, Express
- **Database:** MySQL, PostgreSQL
- **Tools:** Git, Docker, Postman, WSL, Figma
- **Cloud:** Azure, Google Workspace
